

## You could be an instructor.

You don't need an advanced knowledge of woodworking or even of woodworking tools; just have an appreciation of safety and a willingness to learn.

A new instructor must audit a minimum of two classes before teaching a class and there is an orientation outline to help discuss the safety issues and operation of each major machine in the shop. Orientation instructors are asked to participate in no more than 3 orientation classes a year. That's just a few hours on a Saturday or Sunday, three times a year! The Safety Committee will give you a thorough preparation in woodworking machine safety and in how to run the PowerPoint show.

If you're interested in being one of our volunteer safety instructors, contact us [HERE](#).
